

SUMMARY

Systems Engineer focused on mobile development with Flutter and knowledge of native development with Swift and Kotlin. I build production applications for the fintech, IoT, NFC and digital identity sectors, integrating native iOS and Android SDKs, BLoC architectures and CI/CD pipelines. I lead a mobile team balancing coordination with hands-on execution, ensuring stable releases and designing portable architectures toward native development. Active in the mobile community and up to date with the Android and iOS ecosystem, motivated by exploring AI agents to optimize development workflows.

SKILLS

Communication & Interpersonal	Programming	Additional Tools
Effective Communication (EN C1 - ES) Crisis Management - Punctuality Teamwork - Problem Solving	Flutter, Dart, Kotlin, Swift, JavaScript, PHP, HTML/CSS, Laravel, BLoC, Provider, SQL	Git, GitHub, GitHub Actions, CI/CD Claude Code, Postman, Linux Enterprise Architect, Trello

EXPERIENCE

Datec Corp

Santa Cruz, Bolivia | Hybrid | April 2025 – Present

Mobile Tech Lead

March 2026 – Present

- Lead a **Flutter** team across multiple concurrent mobile projects, balancing team coordination with **hands-on** execution in core development and critical problem-solving.
- Set code quality standards that sustain stable, scalable, and on-time deliveries.
- Design a portable architecture that enables a smooth transition toward native development when the product requires it.
- Drive release readiness ensuring stability and alignment with product goals.

Mobile Developer

April 2025 – February 2026

- Built an **IoT** cashless vending solution in **Kotlin**, implementing secure **SDK** integration, in-app security measures, reliable device-machine communication, and on-device testing.
- Created a **Flutter** demo of **NFC** wristbands for point transfers and virtual balance activation, integrating backend flows for pre-authorization and validation.
- Enhanced a **Flutter** virtual payments demo simulating **NFC** and card payments, optimizing UI, **performance** and **Firebase** workflows.
- Developed the ElGeniox beta app in **Flutter** with **Firebase** and **Sentry**, leveraging a scalable architecture to enable quick iterations and reliable client demos.

ValidMe LLC

Newark, Delaware (Remote)

Mobile Developer

December 2024 – April 2025

- Led full-cycle development of a decentralized **identity verification** app (**KYC, biometrics**) in **Flutter** with **BLoC**, applying **asymmetric cryptography** for secure data handling.
- Integrated native **iOS** and **Android SDKs**, **Firebase** push notifications, and ran tasks in **Isolates** for **performance** optimization.
- Designed the **CI/CD** pipeline with **GitHub Actions** for automated deployments to **TestFlight**, **Google Play Console** and **App Store**, monitoring stability with **Crashlytics**.
- Implemented multi-language support and **Zendesk** customer integration, leveraging AI tools.

Presto

Remote

Mobile Developer

August 2024 – November 2024

- Developed onboarding modules for a financial app in **Flutter** with **BLoC**, under **Scrum** methodology.
- Managed integrations via pull requests with **Gitflow**, ensuring quality deliveries for **Android** and **iOS**.
- Distributed versions to testing and production environments through **Firebase App Distribution**, **TestFlight**, **Google Play Console** and **App Store**.

EDUCATION

Universidad Autónoma Gabriel René Moreno

Santa Cruz, Bolivia

Systems Engineering

March 2018 – December 2023

- First Place in Software Development, Faculty Science Fair.

UAGRM School of Engineering

Santa Cruz, Bolivia

Diploma in DevOps Essentials

June 2024 – November 2024

- CI/CD**, automation, infrastructure as code (IaC) and containers.
